Aromatherapy involves the use of essential oils extracted from aromatic plants to improve physical, emotional, and psychological health. These oils are often used in diffusers, massage oils, bath blends, or topical applications, depending on their properties and intended effects.

Key Benefits of Aromatherapy:

- Stress Reduction and Relaxation
- Improved Sleep Quality

How It Works:

The olfactory system—the body's sensory pathway for smell—directly connects to the limbic system in the brain, which governs emotions, memory, and behavior.
