Q1: What is the basic structure of DNA? A: DNA is a double helix consisting of two strands of nucleotides. Each nucleotide contains a sugar (deoxyribose), a phosphate group, and a nitrogenous base (Adenine, Thymine, Cytosine, Guanine). The strands are held together by hydrogen bonds between complementary bases (A pairs with T, G pairs with C).

Q2: How does RNA differ from DNA? A: RNA differs from DNA in several ways: RNA contains ribose sugar instead of deoxyribose. RNA is usually single-stranded, whereas DNA is double-stranded. RNA has Uracil (U) instead of Thymine (T). RNA plays a role in protein synthesis, while DNA primarily stores genetic information.

Q3: Describe the process of DNA replication. A: DNA replication is a semi-conservative process where each original strand serves as a template for a new complementary strand. The process involves: Initiation at specific origins of replication. Unwinding the DNA helix by helicase. Complementary base pairing facilitated by DNA polymerase. Formation of two identical DNA molecules, each with one original and one new strand.

Q4: What is transcription, and why is it important? A: Transcription is the process of synthesizing RNA from a DNA template. It is essential because it converts genetic information stored in DNA into a messenger RNA (mRNA) molecule, which then guides protein synthesis during translation.

Q5: Explain the roles of different types of RNA in protein synthesis. mRNA (Messenger RNA): Carries genetic information from DNA to the ribosome. tRNA (Transfer RNA): Brings amino acids to the ribosome during translation. rRNA (Ribosomal RNA): Forms the core of the ribosome's structure and catalyzes protein synthesis.

Q6: What are mutations, and how do they affect genetic information? A: Mutations are changes in the DNA sequence. They can be: Point mutations (single nucleotide change) Insertions or deletions (adding or removing nucleotides) Mutations can lead to altered proteins, which may cause genetic disorders or beneficial traits, depending on their nature and location.
